Ashish Jayamohan

1608 Corte De Pons, San Jose, CA, 95124 | (650)-229-4920 | ajayamohan@ucsd.edu

Education:

- B.S. Computer Science, UC San Diego (Graduating June 2025)

Experience:

Software Engineering Intern, Surface Optics   (June 2023 - September 2023)
- Optimized SOC-210 bidirectional reflectometer for full bidirectional reflectance distribution function (BRDF) calculation
- Added support for Zemax scatter and transmission (BSDF and BTDF) formats
- Skills: C++, Advanced Photonics/Physics, OpticStudio

Undergraduate Researcher, Halpain Lab - UCSD   (September 2023 - Present)
- Developing novel computational tool for identifying and quantifying dendritic spines along actin cytoskeleton from DAPI-stained fluorescent images
- Skills: Python, FIJI/ImageJ, Keras

Undergraduate Researcher, Dorrestein Lab - UCSD   (September 2023 - Present)
- Studying correlation between molecular assembly index and spectrometry entropy for more efficient tandem mass spectrometry (MS/MS) measurements
- Skills: Java, Python, Mass Spectrometry, MS/MS, Liquid Chromatography

Undergraduate Researcher, Boolean Lab - UCSD   (April 2023 - October 2023)
- Developed efficient Keras RetinaNet-based tool for quantitative organoid detection and analysis
- Worked on developing low-cost tinyML-enabled device to effectively diagnose specific diseases from cytometric data
- Skills: Keras, Python, Java, QuPath

Undergraduate Researcher, Yonder Dynamics   (September 2022 - Present)
- Designed and implemented a compact Raman spectrometry system for biosignature identification with a total cost of under $1000
- Skills: Python, C, Matlab

Research Assistant, UCSF CHORI   (August 2020 - April 2023)
- Studied long-term effects of statin strains on individual patients using genomic analysis
- Contributed to open-source genomic analysis projects (ANNOVAR, plink, etc.) and developed a novel tool for fast phenotypic predictions
- Skills: Python, Java, R

Software Engineering Intern, SpendMend   (February 2021 - October 2023)
- Developed and maintained OCR software for intelligently extracting information from medical invoices
- Skills: C++, Visual Basic, IRIS

Publications:

- 2021 – Implementation and Assessment of Teamwork in Computer Science Education - Jayamohan, Cheuoua (https://makecscount.com/Jayamohan2021.pdf)
- 2023 - Wet Lab Fluorescence Spectroscopy for Detection of Life in Martian Soil - Patil, Johnson, Jayamohan, O' Malley, Muruhuthasan (https://ashishjayamohan.github.io/files/general/poster.pdf)
- 2023 - Adding Zemax Transformation and Output Support for SOC-210 - Jayamohan (Best Technical Skills Poster - UCSD CSE 197 Symposium) (https://ashishjayamohan.github.io/files/general/Jayamohan.Ashish.2023.pdf)

Coursework:

- Design & Analysis of Algorithms
- Database System Principles
- Software Engineering
- Computability and Complexity
- Theory of Computation
- Systems Programming
- Mathematical Algorithms Analysis
- Linear Algebra
- Advanced Data Structures
- Basic Data Structures & Object-Oriented Design
- Introduction to Bioinformatics

Projects:

- **Project Pluto:** Automated prioritization and sampling for whole-genome files using group-based ANNOVAR annotations (https://github.com/ashishjayamohan/project_pluto)
